Hi Brook,

Here is the additional information needed for the NOI to be complete:

- 1) the amount of material that will be moved over the entire project. (Assuming 14' excavation over the entire 38 acres, a total amount of about 877,000 cu. yds. will be moved.)
- 2) The post-mining land use of grazing is most likely to be achieved by covering rocky areas with topsoil as you go.
- 3) The total project surface acreage to be disturbed should be the total area identified in pink on the map (which is about 38 acres), rather than the 10 acres currently written in. Sorry if I wasn't clear on this before. You should specify that you will leave no more than 2 acres of ungraded area open at any one time, based on your current bond of \$14,600.

Here's the amendment form: https://fs.ogm.utah.gov/pub/mines/minerals_related/forms/MR-REV-SMO_EXP.pdf. Since you will be replacing page 4, mark "Replace" and write page 4 to the side. You can scan the signed amendment form and page 4, and email it back in. Branch **won't** need to email it if he has already signed the form.

There are a few non-required items that I will note on the NOI before we approve and return a copy to you. Other than that, it looks good. I'll try to get the State Historic Preservation Office an emailed copy ASAP. Hopefully that will speed things up. Otherwise it will be at least a few weeks. Let me know if you have questions.

Peter

Hi Brook,

I just noticed that there is a difference between the area surveyed by the archaeologist (19 acres) and the area planned for mining (38 acres). I should have seen it sooner, but just caught it as I was sending the info by email to SHPO.

There is one more thing you will need to do for a complete NOI that we can approve:

4) Replace the operation map with a similar map showing the proposed mining area to be no greater than the surveyed area of approximately 19 acres, rather than the entire 38. Refer to page 2 of the archaeology report for the shape of the 19 acre area.

The total disturbance acreage on page 4 of the NOI form will also need to be changed from 10 acres to 19 acres (not the full 38 acres, as just discussed).

Peter
